SUMMARY

Backend Engineer with 5+ years of experience building Java/Spring Boot microservices and Kafka event-driven pipelines. Spent nearly 5 years in Walmart Global Tech's **Pricing team**, powering price management for **Massmart** (Game, Makro, Builders), Walmart's African business with 300+ stores across 8 countries. Owned customer-facing services end-to-end, from design through production support.

EXPERIENCE

Freelance Backend Engineer Remote

Self-employed *Dec 2025 – Present*

- **Royal Motors** (automotive services, Dec 2025 – Mar 2026): designed and built Spring Boot REST APIs for appointment scheduling, slot availability and booking workflows, replacing a fully manual booking process.
- Structured customer management, booking and appointment tracking as separate service modules.
- Taking on freelance backend engagements alongside focused upskilling in system design and cloud-native development.

Walmart Global Tech Bangalore, India

Pricing Team – Massmart (Walmart Africa) *Aug 2020 – May 2025*

Software Engineer II *2022 – May 2025*

- Owned end-to-end design, development and production support of a **customer-facing pricing microservice** (Java, Spring Boot), serving **120 peak TPS** at **p95 latency of around 100 ms**.
- Designed **Kafka-based event-driven pipelines** processing **1M+ price-change events/day**, propagating prices to 300+ Massmart stores across Game, Makro and Builders; **improved throughput by 40%**.
- Built and scaled Spring Boot pricing microservices for high-traffic retail and e-commerce channels, sustaining **p95 latency of 120 ms**.

Software Engineer I *Aug 2020 – 2022*

- Engineered a cron-scheduled data pipeline on **Azure** ingesting ~**100K articles (SKUs) daily**, keeping product and price data consistent across stores without manual intervention.
- Automated operational workflows in **Python**, saving the team **15+ engineer-hours per week** of manual effort.

Software Development Intern *May 2019 – Jul 2019*

- Built a React Native proof-of-concept app on an SAP HANA backend to visualise POS device metrics and assess React Native for enterprise use.

TECHNICAL SKILLS

Languages	Java, Python, SQL
Backend	Spring Boot, Microservices, REST APIs, Apache Kafka, Event-Driven Architecture
Databases	PostgreSQL, Azure Cosmos DB, Azure SQL, Elasticsearch
Cloud & DevOps	Microsoft Azure, GCP, Docker, Kubernetes, Git

PROJECTS

Wikipedia Search Engine

Python, Information Retrieval *IIIT Hyderabad*

- Built a search engine over a **21 GB Wikipedia dump**: a custom indexer that builds posting lists and a retriever that ranks documents by relevance using a combination of ranking techniques.

EDUCATION

International Institute of Information Technology (IIIT), Hyderabad 2018 – 2020

M.Tech, Computer Science

K.J. Somaiya College of Engineering, Mumbai 2014 – 2018

B.Tech, Electronics & Telecommunication Engineering
