Summary

Software Engineer with 5+ years of experience building Java/Spring Boot microservices and Kafka event-driven pipelines. Spent nearly 5 years in Walmart Global Tech's **Pricing team**, powering price management for Walmart's African business with 300+ stores across 8 countries. Owned customer-facing services end-to-end, from design through production support.

Experience

Freelance Backend Engineer

Dec 2025 – Present

Self-employed *Remote*

- **Royal Motors** (automotive services, Dec 2025 – Mar 2026): designed and built Spring Boot REST APIs for appointment scheduling, slot availability and booking workflows, replacing a fully manual booking process.
- Taking on freelance backend engagements alongside focused upskilling in system design and cloud-native development.

Walmart Global Tech

Aug 2020 – May 2025

Pricing Team - (Walmart International) *Bangalore, India*

Software Engineer II *Aug 2022 – May 2025*

- Owned end-to-end design, development and production support of a **customer-facing pricing microservice** (Java, Spring Boot), serving **120 peak TPS** at **p95 latency of around 100 ms**.
- Designed **Kafka-based event-driven pipelines** processing **1M+ price-change events/day**, propagating prices to 300+ Massmart stores across Game, Makro and Builders; **improved throughput by 40%**.
- Automated operational workflows in **Python**, saving the team **15+ engineer-hours per week** of frequent manual effort.

Software Engineer I *Aug 2020 – July 2022*

- Joined a newly established engineering team responsible for building a pricing microservices platform from the ground up, modernizing legacy monolithic pricing capabilities into independently scalable services.
- Contributed to the migration of pricing data and business capabilities from the legacy monolith to the new microservices architecture, enabling more modular and maintainable pricing operations.

Software Development Intern *May 2019 – July 2019*

- Built a React Native proof-of-concept app on an SAP HANA backend to visualise POS device metrics and assess React Native for enterprise use.

Technical Skills

Languages	Java, Python, SQL
Backend	Spring Boot, Microservices, REST APIs, Apache Kafka, Event-Driven Architecture
Databases	PostgreSQL, Azure Cosmos DB, Azure SQL, Elasticsearch
Cloud & DevOps	Microsoft Azure, GCP, Docker, Kubernetes, Git

Projects

Wikipedia Search Engine

IIIT Hyderabad

Python, Information Retrieval

- Built a search engine over a **21 GB Wikipedia dump**: a custom indexer that builds posting lists and a retriever that ranks documents by relevance using a combination of ranking techniques.

Education

International Institute of Information Technology (IIIT), Hyderabad

2018 – 2020

M.Tech, Computer Science

K.J. Somaiya College of Engineering, Mumbai

2014 – 2018

B.Tech, Electronics & Telecommunication Engineering
