Siddhesh **Sawant**

Software Engineer | Backend Developer

+91 8660911187 | ssiddhesh64@gmail.com | https://github.com/ssiddhesh64 | https://www.linkedin.com/in/ssiddhesh64/

Professional Summary

I am a Backend Engineer with **5+ years of experience** building and scaling high-performance microservices for large-scale e-commerce platforms. Have Expertise in **Java, Spring Boot, Python and event-driven architectures**, with proven ownership in designing Kafka-based systems, improving reliability and observability, and delivering high-impact customer-facing solutions

Work Experience

Walmart Global Tech
August 2020 - May 2025

Software Developer 2
(Bangalore - 5 Years)

- Developed scalable microservices using **Java Spring Boot**, handling **120K–180K requests/day** with **p95 latency 120 ms** for high traffic e-commerce systems
- Owned and delivered a customer-facing microservice end-to-end, handling **120 Peak TPS** and **p95 latency 100 ms**
- Automated operational workflows using Python, **saving 15+ hours/week of manual effort** and improving team productivity by 40%
- Designed and implemented Kafka-based event-driven pipelines processing **1M+ events/day**, improving system throughput by 40%
- Engineered a cron-scheduled data processing pipeline on Azure Cloud to handle daily article ingestion of **approx 100K articles**, reducing manual effort and ensuring consistent, reliable data updates

Software Developer - Freelance
Dec 2025 - March 2026

Royal Motors
Remote

- Built scalable backend APIs using Spring Boot to manage appointment scheduling, slot availability, and booking workflows.
- Developed RESTful APIs and microservices-based modules to support booking operations, customer management, and appointment tracking.
- Improved operational efficiency by digitizing manual appointment scheduling and reducing booking conflicts.

Walmart Global Tech
May 2019 - July 2019

Software Development Intern
(Bangalore - 10 weeks)

- Developed a **React Native mobile application** integrated with SAP HANA backend to visualize POS device metrics.
- Built a proof-of-concept application to evaluate feasibility and performance of React Native for enterprise use cases

Skills

Programming Languages	Java, Python, C/C++
Frameworks	Spring Boot, Kafka, PostgreSQL, Elasticsearch, GCP, Docker, Kubernetes
Databases	Azure Cosmos DB, Azure SQL

Education

International Institute of Information Technology Hyderabad
July 2018 - May 2020

Masters of Technology
Computer Science
CGPA: 7.32/10.00

K.J. Somaiya College of Engineering
May 2014 - May 2018

Bachelors of Technology
Electronics & Telecommunications Engineering

Projects

Wikipedia Search Engine | Information Retrieval
November 2019

Python | Information Retrieval

- Developed a highly efficient Search Engine for a Wikipedia dump of 21 GB, using an indexer and a retriever. The indexer indexes the dump into posting lists. The retriever provides documents ranked by their relevance to the given query using a combination of different ranking techniques
